Counter: Bob Yunick and Bill Lee at Cliff Edge Overlook
Visitors: Gary Goodness at Glen Doone ~ 10:40 - 11:40
Comments: Wind started as WSW at 0930, but shortly after noon had switched to nearly SE, causing even TV's to stop flying. Sun and visibility were gorgeous, but wind was wrong despite morning frost. Some raptors were very distant, appearing only as specks even in a scope at 20X. We had only a fleeting, distant view of a UR at 1110, but Gary at Glen Doone had picked up the bird earlier than we did, and believed it to be an NG. Many TV's were no doubt locals, possibly counted more than once. Bird of the day: A very late Tree Swallow at 1236.

Robert P. Yunick
